DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3, 5, 6, 31, 33, 35, 36 are rejected under 35 U.S.C. 102(e) as being anticipated by Bohnke (US 6,546,107)

Bohnke discloses providing a space forming part within the housing, wherein the position of the space forming part so that longitudinal direction of the space forming part is along a surface electric current distribution which would exist if the space forming part was not provided in the housing (Fig 4)(re claims 1, 31)

Re claims 3, 5, 6, 33, 35, 36 the invention is functioning as claimed and the see Fig 4

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4, 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bohnke.

The teaching of Bohnke as discussed above does not disclose the housing has rectangular shape. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the shape of the housing of Bohnke for intended purpose since more than a mere change of form is necessary for patentability. In re Span-Deck Inc. v. Fab-Con, Inc. (CA 8, 1982) 215 USPQ 835.

Response to Arguments

Applicant's arguments with respect to claims 1, 31 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2831

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
